Mumshad Mannambeth

Founder & CEO at KodeKloud

Alfaturachman Maulana Pahlevi

has successfully completed the online Specialization

DevOps Pro: Linux, Docker, Kubernetes, CI/CD & IaC

Throughout this Specialization, you gained hands-on experience in DevOps engineering, mastering the securing of Linux environments with SSH, SELinux, Bash, and Ansible; building CI/CD pipelines with Git, Jenkins, and Pipeline-as-Code; packaging and orchestrating applications using Docker, Docker Compose, and Kubernetes; and provisioning AWS infrastructure with Terraform and CloudWatch. You also developed critical professional skills, including systematic troubleshooting, analytical problem-solving, and the ability to independently manage complex, multi-layered engineering challenges.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
